

Stupid ChatOps Tricks

Hubot patterns with Slack, Jenkins and Ansible

Rex Roof
@rexroof

github.com/rexroof/slack-hubot-demos

@rexroof

using Jenkins to run scripts

- has dependencies installed already from running our tests
- has our repos
- central spot with keys for authentication
- can handle task scheduling

github.com/rexroof/slack-hubot-demos

@rexroof

reasons not to use Jenkins

- everything is a plugin
- painful UI
- config in SCM but is XML
- not in my terminal workflow
- glorified shell-script executor
(aside: pipelines)
